

ALIPLAST **EXTRUSION**

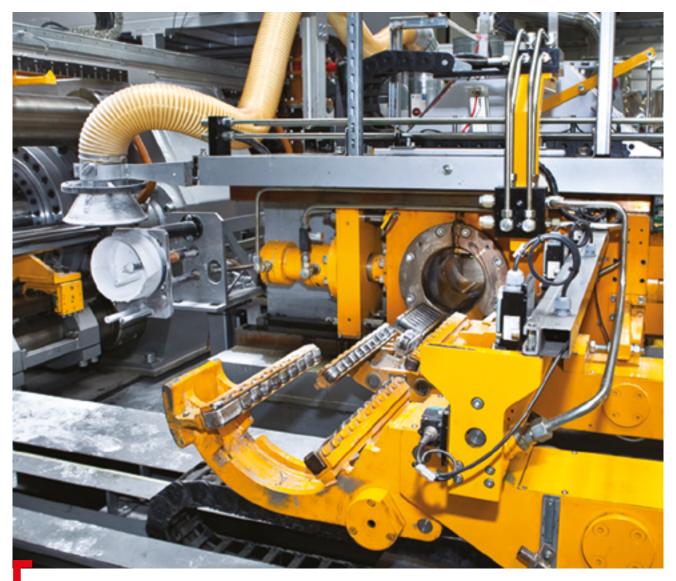

Aliplast Extrusion, the Polish part of the international Corialis Group, is a producer of aluminium profiles working on the Polish and European market for more than 10 years. The product range of Aliplast Extrusion includes standard profiles and special sections for Customer's individual solutions. The company has four presses for extrusion of aluminium profiles with potential of almost 50 thousand tonnes per year.

- two Tecalex lines with a pressure of 2200 T and 2800 T
- two SMS lines with a pressure of 2400 T

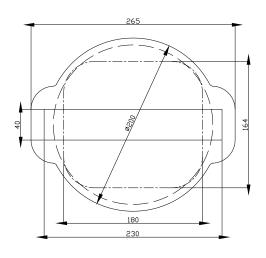

The company offers advanced possibilities of mechanical treatment of aluminium profiles and surface, i.e. anodizing and powder coating.

 $\textbf{Corialis} \ \texttt{Group} \ \textbf{Cor} e \ \textbf{I} \\ \textbf{nnovative} \ \textbf{Al} \\ \textbf{uminium Integrated S} \\ \textbf{olutions is an international group of companies: Aliplast NV \& Al-leading to the property of t$ iplastExtrusionNVinBelgium,ProfilsSystèmesinFrance,AliplastSp.zo.o.&AliplastExtrusionSp.zo.o.inPoland,Smart Systems Ltd. & Smart Extrusion Ltd. in Great Britain, Centroalum S.A. in Spain, Aliplast Aluminium Systems d.o.o. in Ser $bia, Lingote-Aluminios in Portugal, H-Systems in South Africa Ltd., JMD Systems on the island of R\'{e}union and Gutmann and Systems on the island of R\'{e}union and Gutmann and Gutmannn$ Group in Germany. Corialis is a leading player in the design and manufacturing of high quality, technologically-advanced aluminium profiles and systems.

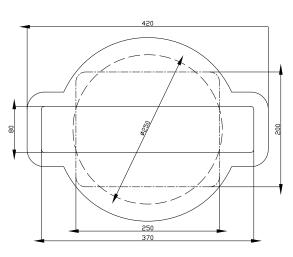

press 1/**8**"

Alloys:

POWDER **COATING**

Aliplast Extrusion has the state-of-the-art powder coating line. The applied modern paint coating techniques and state-of-the-art machine fleet allow obtaining products that meet the quality standards and the highest requirements of the Customer. The own laboratory provides ongoing control of the aluminium surface preparation process before painting, and experienced personnel constantly supervise the correctness of manufacturing processes while maintaining the relevant European QUALICOAT standards (license number: 1518) and QUALIDECO (license number PL-0001).

1ST VERTICAL POWDER COATING LINE

- ▶ dimension of profiles 200 mm x 100 mm x 7400 mm
- fully automated line for powder coating aluminium profiles
- ► the capacity of 750 m² per hour
- modern and ecological technology

2ND VERTICAL POWDER COATING LINE

- ▶ dimension of profiles 200 mm x 100 mm x 7000 mm
- full automated
- production line output: 750 m² per hour
- ▶ two V-shaped cabins with 20 guns per cabin
- powder coating application using the latest GEMA product AP 1.1 powder pumps with the dense phase powder coating flow technology
- a new generation powder coating polymerizing oven

The technology of the Aliplast Extrusion paint line ensures:

- reliability in maintaining the shape of workpieces
- elimination of the appearance of stripes with a lighter and darker colour
- modern and ecological technology, fully supplied by rainwater from the underground reservoir
- ▶ chrome-free treatment

POWDER COATING

HORIZONTAL POWDER COATING LINE

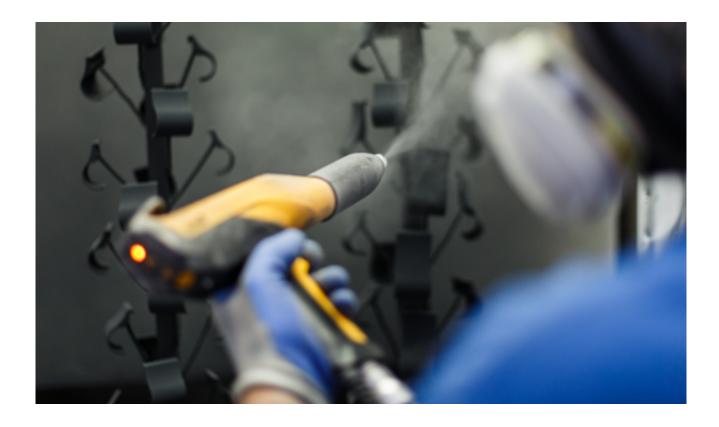

▶ fully automated powder coating line for aluminium profiles with a capacity of 360 m² per hour

HORIZONTAL POWDER COATING LINE DEDICATED TO FLAT WORKPIECES

- ▶ maximum dimensions: 4000 mm x 1500 mm x 500 mm
- state-of-the-art powder coating equipment Opti Star 4.0 with Gema Opticenter CM40 on two parallel powder coating booths
- automatic detection of the workpiece/start of painting/selection of the manipulator stroke height and the number of working powder guns (optical system)
- ▶ powder application in the Cleanroom technology filtered atmosphere with controlled temperature, humidity and overpressure
- ▶ the average capacity of 70 m² per hour, the line equipped with double overhead conveyor systems
- > speed 2.5 m/min on each of the 2 conveyors

POWDER COATING LINE DEDICATED TO ALUMINIUM ACCESSORY

- horizontal, manual varnishing line
- chemical treatment dedicated to aluminum castings
- an automatic manipulator that goes through the entire chemical treatment process
- state-of-the-art Gema OptiFlex 2Q application (new solution ensuring fast colors during the process of painting - 30 seconds)

ALIPLAST WOOD COLOUR **EFFECT**

The aluminium decoration line in the Decoral system allows obtaining decorations imitating the structure of wood (Aliplast Wood Colour Effect) and Aliplast Loft View stone surfaces.

- functionality fully automated production process (productivity, 80-120 profiles per hour)
- automated film welding process (ultrasound head)
- pass-through furnace

The Decoral process technology makes it possible to paint both profile sections and aluminium sheets. Aliplast Wood Colour Palette Effect contains 18 wood colours: classic golden oak, golden oak, walnut, winchester, pine, mahogany, dark mahogany, wenge, golden cherry, siena rosso, siena PL, swamp oak, beech, bleached oak, bleached beech, turner oak, golden walnut and burned mahogany.

The Aliplast Loft View palette includes 3 decoration options imitating stone surfaces:

ANODIZING

Anodizing is an electrochemical process that converts the metal surface into a decorative, durable, corrosion-resistant, anodic oxide finish. Aluminium is ideally suited to anodizing, although other nonferrous metals, such as magnesium and titanium, also can be anodized. Aliplast Extrusion has a line for anodizing with a maximum length of up to 7200 mm, for refining of aluminium surfaces, used, among others, in construction, interior decoration, automotive industry, shipbuilding, construction carpentry and furniture production. The quality of anodized is confirmed by the QUALANOD - certificate No.1808.

SHOT-BLASTING

Abrasive blasting performed in order to homogenise the surface and obtain uniform structure of the material. A dedicated service for materials with high aesthetic requirements.

The minimum length of the material to be processed is 4000 mm.

BRUSHING

Type of treatment used to obtain a decorative surface of aluminium profiles. It effectively masks lines and wide strips and provides the possibility to remove minor mechanical damage.

The minimum length of the workpiece is 4000 mm. Flat and parallel surfaces can be brushed.

Aliplast Extrusion offers following colours: C-0 natural, C-31 light champagne, C-32 champagne, C-33 olive, C-34 bronze and C-35 black

MACHINING

Aliplast Extrusion is a company providing comprehensive solutions from the manufacturing of aluminium profiles to mechanical processing and surface treatment services. The company invests in a high technological level - modern machining centres accelerate and streamline production processes while maintaining high quality services.

ALIPLAST EXTRUSION PROCESS FLEET:

- ▶ 3 CNC machines
- ▶ 5 milling plotters
- ► 4 saws for cutting profiles
- cutting press for sheets
- sheet metal bending machine
- ▶ 3 bending machines for profiles
- 2 stations for tumble finishing
- ▶ 1 welding station

Aliplast Extrusion offers mechanical working of profiles using three- and four-axis numerically controlled machining centres. The scope of machining using the numerical centre includes: profile milling, sheet metal milling, threading, engraving, drilling, cutting the ends of profiles.

QUALITY

Aliplast Extrusion strives for continuous improvement and complete elimination of defects from the moment of feeding the production material to the finished product leaving the company.

Quality control in Aliplast Extrusion includes: data analysis, strength tests, hardness measurements, measurements of profile dimensions. On-site tests of mechanical properties are carried out and the obtained results can be used to issue the 3.1 acceptance certificate. With the implemented and continuously maintained Factory Production Control, Aliplast Extrusion can issue declarations of performance for the manufactured profiles.

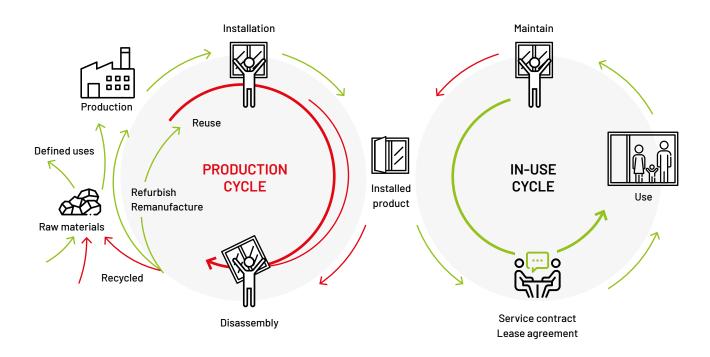

ENVIRONMENT

Aliplast Extrusion is a modern and dynamically developing company specialising in the production of aluminium profiles. The basis of the Company's business model is sustainable development, both in the product offer and in manufacturing processes.

Aliplast Extrusion means an innovative and environmentally friendly solutions optimising production processes, advanced management systems, safe working environment, reasonable environmental policy, sustainable use of resources, environmentally friendly waste management and pollution prevention.
